

# Week 1 Exercise: R Test

*Student Name*

*05 January, 2017*

## Directions:

This is an RMarkdown file. It will allow you to integrate text and R code into one file. Please complete parts 1 and 2 below. Part 3 should be left alone (it should work as needed). When you are done, **Knit** the text and code into a PDF file. Basically, just press the **Knit** button above. After Knitting, please submit via GitHub. Review your inclass Git assignment if needed. It is due on **January 18<sup>th</sup>, 2015 at Noon**.

## Assignment:

1. Edit your name in the *author* line above (line 3)
2. Print a message in the R terminal  
Ex. Print "*Hello, World!*"  
Now, print your own statement
3. Tell us about your system. Basically, just leave this part alone and it will do magic

## Do Not Modify This Part

```
info <- unname(c(Sys.info()[6],  
                .Platform$OS.type,  
                Sys.info()[1:2],  
                R.version.string,  
                .Platform$GUI,  
                system("git --version", intern = TRUE)))  
info
```

```
## [1] "lennonj"          "unix"  
## [3] "Darwin"           "15.6.0"  
## [5] "R version 3.1.2 (2014-10-31)" "X11"  
## [7] "git version 2.6.4 (Apple Git-63)"
```
